Company of AS Citadele Banka group

Transactions with Derivatives. Derivative transactions are permitted on the account of the Fund for hedging against the risk of fluctuations in the market value of the Fund's assets or for the purpose of profit making.

More detailed information on transactions with derivatives is provided in Sections 1 and 3 of the Prospectus of the Fund.

Your income or loss is reflected in the increase or decrease in the value of share certificates. The value of the share certificate is calculated on each business day.

Transactions with share certificates of the Fund. You can request us to repurchase your share certificates at any time and our responsibility is to satisfy such a request. Applications for selling share certificates of the Fund can be submitted to us or to the distributor of the Fund on any business day. You can also sell your share certificates on the secondary market. Transactions with share certificates of the Fund are carried out in accordance with the provisions of Sections 10 and 11 of the Prospectus of the Fund.

Preferred investment period. Given the volatility of investments and the long-term investment strategy of the Fund, the Fund is more suitable for investors willing to invest for the time period of at least 3 years.

Risk and Reward Profile

Synthetic Indicator indicatively shows the volatility of the profitability of the Share Certificate Class; the higher this indicator, the higher the potential reward; at the same time it involves a higher risk to suffer losses. The lowest category of the indicator does not mean that the investments in the Fund are not exposed to risk.

The Share Certificate Class belongs to risk category 3, because the historical annualized volatility of its return has been below average (between 2% and 5%). The established risk category may change in future.

Significant risks not included in determining the synthetic indicator are as follows:

Operational risk. A possibility that the value of the Fund's assets decreases due to an error of our employees or systems, incomplete internal processes or controls, which may result in a reduction of your investment value.

Liquidity risk. A possibility that due to economic, market or other conditions the sale of financial instruments in the desired time is problematic. Low liquidity can have an adverse effect on the value of financial instruments that in turn may result in a reduction of your investment value.

Counterparty Risk. A possibility that a counterparty defaults on its obligations towards the Fund that in turn may result in a reduction of your investment value.

Event risk. A possibility to suffer losses due to unforeseeable events, e.g., political developments, changes in taxes, nationalisation, sanctions, devaluation, etc., which may negatively affect your investment value.

Detailed information on risks is provided in Section 2 of the Prospectus of the Fund.
